NOTE SULLE FINITURE

Vetro soffiato

Il vetro soffiato è la risultante di una lavorazione artigianale e non industriale e seriale.

Ogni oggetto, per quanta attenzione possa mettere il maestro vetraio, sarà diverso l'uno dall'altro, sia in termini di dimensione che di forma e finitura.

Questa diversità rende ogni oggetto creato dai mastri vetrai, unico ed esclusivo.

Ogni imperfezione, quindi, sia essa in termini di forma, dimensione o finitura, non costituisce certo difetto, ma una caratteristica tipica del lavoro manuale.

INFORMATION ON THE GOODS' FINISHING

Blown glass

Blown glass is the result of an artisanal process. It is a hand-made product that does not involve any industrial or mass production process.

Despite the abilities of the artisan, every glass will be different from the other in terms of size, shape and finish.

Every glass blown by the "Mastro vetraio" (master of glass) is unique and special.

No imperfection, in terms of size, shape and finish, is a defect, but rather the distinguishing feature of a hand-made product.

Classe di isolamento / Class of insulation

Ai fini della protezione elettrica, gli apparecchi sono classificati in base ad indicazioni CEE.

For electric production purposes the fixtures are classified in accordance with EEC guidelines.

Para la protección eléctrica los aparatos se clasifican en base a las indicaciones de la CEE.

Die Geräte sind hinsichtlich der elektrischen Absicherung aufgrund der EWG-Normen klassifiziert.

Concernant la protection électrique, les appareils sont classés selon les indications CEE.

С целью электробезопасности все приборы классифицированы в соответствии с инструкциями CEE.

Classe I Isolamento funzionale in ogni parte, provvisto di messa a terra, o con morsetto se fisso o con conduttore e relativa spina con contatto di terra, se mobile.

Class I Functional insulation in every part and ground terminal or clamp in the unit is fixed, with conductor and relative plug with ground contact if the unit is mobile.

Classe I Aislamiento funcional en cada parte provista de toma tierra o con pinza fijada, con cable y terminal con contacto de tierra si es móvil.

Klasse I Isolierung jedes Bestandteiles mit Erdung, bzw. mit Klemme falls festmontiert oder Drahtleitung und Schuko-Stecker falls beweglich.

Classe I Isolement fonctionnel de toutes les composantes, avec mise à la terre ou borne si l'appareil est fixe; avec conducteur et fiche avec contact à la terre si l'appareil est mobile.

Класс I Функциональная изоляция в каждой детали, оснащенная заземлением или с помощью зажима для стационарных изделий, или через проводник и соответствующую вилку с контактом в землю для переносных изделий.

Classe II Doppio isolamento e/o isolamento rinforzato in ogni parte e senza dispositivo di messa a terra.

Class II Double insulation and/or reinforced insulation in every part and without ground devices.

Classe II Doble aislamiento Y/O aislamiento reforzado en cada parte i sin toma tierra.

Klasse II Doppelte Isolierung, bzw. verstärkte Isolierung der Teile, ohne Vorrichtung für Erdung.

Classe II Double isolement et/ou isolement renforcé de toutes les composantes et sans dispositif de mise à la terre.

Класс II Двойная изоляция и/или усиленная в каждой детали и без устройства заземления.

Classe III Apparecchio in cui la protezione contro la scossa elettrica si basa sull'alimentazione a bassissima tensione di sicurezza e in cui non si producono tensioni superiori alla stessa.

Class III Appliance in which protection against electrical shock is guaranteed by the extremely low-voltage power supply and which does not produce higher voltages.

Classe III Aparato en el cual la protección contra la descarga eléctrica se debe a la alimentación a muy baja tensión.

Klasse III Zum Schutz vor elektrischen Schlägen mit Kleinspannung gespeistes Gerät, in dem keine über dem Speisewert liegende Spannung erzeugt werden.

Classe III Appareil avec protection contre les décharges électriques basée sur l'alimentation à une tension de sécurité très basse et sans possibilité de production de tensions supérieures.

Класс III Прибор, в котором защита от электрического удара основана на очень низком напряжении и в котором не возникает напряжение, превышающее, превышающее, указанное.

Grado di protezione IP / IP protection

Il grado di protezione degli apparecchi di illuminazione viene indicato con la sigla IP (International Protection) seguita da due cifre caratteristiche. La prima di queste due cifre descrive la protezione che questi possiede contro la penetrazione di corpi solidi. La seconda indica la protezione nei confronti dei liquidi.

Gradi di protezione indicati dalla prima cifra

- 0 Non protetto
- 1 Protetto contro la penetrazione di corpi solidi di dimensioni maggiori a 50 mm
- 2 Protetto contro la penetrazione di corpi solidi di dimensioni maggiori a 12 mm
- 3 Protetto contro la penetrazione di corpi solidi di dimensioni maggiori a 2,5 mm
- 4 Protetto contro la penetrazione di corpi solidi di dimensioni maggiori a 1 mm
- 5 Protetto contro la polvere
- 6 Totalmente protetto contro la polvere

Gradi di protezione indicati dalla seconda cifra

- 0 Non protetto
- 1 Protetto contro lo stillicidio
- 2 Protetto contro lo stillicidio, con un'inclinazione fino a 15°
- 3 Protetto contro la pioggia
- 4 Protetto contro gli spruzzi d'acqua
- 5 Protetto contro i getti d'acqua
- 6 Protetto contro le onde
- 7 Stagno all'immersione
- 8 Stagno alla sommersione

The protection rating of lighting appliances is shown by the letters IP (international protection) followed by two characteristic digits. The first of these two digits indicates the degree of protection that the appliances offer against the ingress of solid foreign objects. The second indicates the protection against the ingress of water.

Protection ratings indicated by the first digit
